

What do I do now?

Dear Supporter of Helena Aurora Range (Bungalbin)

Thanks for attending today.

As you have heard, after a year of waiting there is little sign of progress from the government in creating a Class A national park over HAR – without which mining will be a constant threat!

So we have to increase the pressure on the government to follow through on its promise to protect Bungalbin.

The most important thing to do now is to write to the Premier, Mark McGowan MLA and the Environment Minister Stephen Dawson MLC and let them know that you are very concerned about the long delay and want the range protected as soon as possible. Please let us know of any replies you get!
